SUMMARY

Software Engineer with **3+ years of experience**, Built and **deployed production grade systems** with **MERN stack** along with Next.js, and TypeScript. Lastly contributed at The DevTime Tech with **99% uptime** also right now leveraging expertise in Python, AI Services and Holds a **B.E. in Computer Engineering** degree from GEC-Rajkot.

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python

Frontend: HTML/CSS/SCSS, React.js, Next.js, Angular, Tailwind, Bootstrap, MUI, Quasar, Vite, Tiptap

Backend: Node.js, Express.js, Firebase (Auth, Hosting, Storage), Razorpay

Database: MySQL, PostgreSQL, MongoDB, Pinecone (embeddings)

Cloud & Deployment & CI/CD: AWS, GCP, Vercel, Github Actions, CircleCI, Docker

Version Control: GitHub, GitLab, Bitbucket

AI/ML & Developer Tools: LangChain, OpenAI, Ollama, Claude, Gemini, Vo, Cursor

WORK EXPERIENCE

Software Engineer (The DevTime Tech.)

March 2022 – Aug 2026

- Built and maintained document editor using Tiptap with custom extension feature, enabling seamless multi-user collaborative editing for **500+ users**.
- Delivered many high-quality features across React.js, Next.js projects with Redux & Context API state management in applications and contributed to consistent client satisfaction.
- Designed & developed AI LinkedIn Post writing B2B platform. developed a Role-based system with AI influence campaigns generation & Integrated LinkedIn Posts and Authentication APIs also added websocket for Realtime data.
- Led frontend for an advanced document error detection system and write code using PDF.js for real-time PDF highlights, commenting, and import/export that resulted in a **boosting reviewer efficiency by 40%**.
- Developed realtime generative AI chat like ChatGPT with edit, regenerate, chat history, folder and favorites functionality.

PROJECTS

Paper AI ([Live Link](#))

Next.js, Redux, Node.js, MongoDB, Langchain, AI services, Razorpay

- Engineered an AI-powered Document search platform for engineers. Implemented a PDF chat and summarization feature. It is **used by 100K+ users** with **5M+ impressions** on Google Search Engine.
- In Frontend I use Next.Js with Typescript, Redux & radix-ui also Integrated Razorpay for secure payment processing, supporting premium access and monetization features.
- Implemented **RAG-based document retrieval** using LangChain and vector embeddings, enabling users to ask questions against uploaded technical documents and receive context-aware responses.

EDUCATION

Bachelor Of Engineering in Computer Engineering

2019 – 2023

Gujarat Technological University

CERTIFICATIONS

Backend with AI-First Software Engineer ([View Certificate](#)) - Airtribe

AWS Educate Getting Started with Storage ([View Certificate](#)) - AWS Educate

AWS Educate Introduction to Cloud 101 ([View Certificate](#)) - AWS Educate
